

# StingRay and BioRay

With a compact modular design measuring only 19 mm in diameter and using the industries' premier laser diodes, the StingRay delivers best-in-class performance. High-quality glass optics and sophisticated drive electronics deliver the power and control to your application to improve signal-to-noise and measurement speed.

StingRay is the highest-performing top-hat-profile laser available that comes in a variety of fan angles to create the line you need for measurement and profiling applications. Offering the same focus adjustment as the BioRay, the StingRay allows the user to optimize the focus location for the best measurement resolution.

BioRay is a Stingray with an included Heat Sink and Mounting Plate for Life Science applications with an elliptical beam output and a user-adjustable beam divergence (adjustable focus).

With optional RS-232 control the laser power is adjustable as well as onboard diagnostics for operating hours, diode current, output power, temperature, and more.

Select StingRay and BioRay models also include the  $\mu$ Focus and Fiber-Ready (FR) versions.

### StingRay Power Supply

**Part Number: 1232091**

The StingRay Power Supply is designed to power the StingRay laser and includes the power adaptor and the power cord.

### StingRay Multi-Axis Mount

**Part Number: 1280838**

The StingRay Multi-Axis Mount provides the user/integrator with the capability of precision movement/alignment of the laser as it is installed into an instrument or application.

This movement consists of:

- 360-degree rotation about the laser's mechanical axis
- Tilt about the x-axis up to seven degrees

The StingRay Multi-Axis Mount provides multiple mounting options for the user, conforming to the standard StingRay/OBIS footprint. It also allows for more general mounting with two machined slots for quick installation.

### StingRay Heat Sink Mount

Part Number: 1222896

This mount is specifically designed to match the thermal management design employed in the StingRay laser family. This product offers excellent thermal and pointing stability. The mount includes four thru holes and four tapped holes with a precision pin slot for easy and repeatable mounting.

### StingRay Remote

Part Number: 1231404

The StingRay remote is meant to be used with lasers that include a Hirose connector. It includes a keyswitch, an interlock, the control software, and a power supply. Use with lasers that include a Hirose connector.

### StingRay 12 Pin Hirose Connector to Flying Lead Break Out

Part Number: 1229640

This convenient cable provides an easy break out of the I/O signals used by the StingRay laser family. When the laser uses the Hirose Connector, this mating connector can be used to quickly convert to Flying Lead with simple access to connecting to and receiving signals from a StingRay laser.
